Building Control Systems HVAC Repair or Replace Professional Services Certified Technicians

WingleWare, LLC is a small, women-owned business providing Building Control Systems and HVAC repair services since 2018. WingleWare has provided services to the federal government, primarily as a subcontractor, since 2019. WingleWare's headquarters is in Kalamazoo, MI, providing national support through a network of contract employees and subcontractors.

Design

WingleWare provides design, installation, optimization and integration of Building Control Systems and related HVAC repairs, upgrades, and installation.

Installation

WingleWare brings unsurpassed expertise and experience in the implementation of building controls solutions. Our small teams and established processes ensure consistency and excellence in execution.

Optimization

WingleWare's solutions are designed and programmed to ensure automation systems augment existing operations to achieve peak performance, reducing energy consumption and maximizing comfort.

WingleWare has worked with experts at Pacific Northwest National Lab (PNNL) to develop industry leading supervisory integrations including the integration of metering, photovoltaic systems, electric charging stations, and other building systems creating microgrids.

Experts in the following services,

- System Consultations & Site Assessments
- HVAC Repairs & Emergency Service Response
- HVAC System Replacements (Partial or Full)
- Retrofit Installations for Legacy Equipment
- Smart Thermostat & Control Upgrades
- Custom HVAC Controls Programming (Niagara, BACnet, etc.)
- Building Analytics & Reporting Dashboards
